EDUCATION

Virginia Tech | Virginia, USA

Masters in computer science

Expected Graduation: May 2025

GPA: 3.95/4

V R Siddhartha Engineering College | India

Aug 2014 - Aug 2018

Bachelors in Electronics & Communications Engineering

GPA: 8/10

SKILLS

Languages/Databases: Java, Python, C, JavaScript ES6, HTML, CSS, MySQL, PostgreSQL, MongoDB

Libraries/Frameworks: React.js, Node.js, JUnit, Bootstrap, jQuery, Django, Hadoop/Spark

Developer Tools: Git, GitHub, VS Code, PyCharm, Eclipse IDE, IntelliJ, Docker, JIRA, Figma,

Cloud Technologies: AWS (EC2, Lambda, VPC, RDS, API Gateway, CloudWatch, S3, Route 53, AWS SageMaker, EMR), Google Cloud Platform

Certifications: Data Structures [Link](#)

Coursework: Software Engineering, User Interface Software, Web Application Development, Cloud Computing, Object Oriented Programming (OOP), Operating Systems, Mobile Application Development, Data Structures & Algorithms

EXPERIENCE

Capgemini

June 2020 – July 2022

Associate Software Engineer | HTML, CSS, Bootstrap, Angular, SQL, PLSQL, SpringBoot

Hyderabad, India

- Modified queries as part of performance tuning to reduce the runtime from more than a minute to **2.5 secs**.
- Designed 5 major modules of **full-stack** IAM Toolkit web application.

Capgemini

May 2019 – May 2020

Software Engineer | SQL, PLSQL, IAM, Python, Scheduler/Cron Jobs, IO

Hyderabad, India

- Automated users list extraction process using **SQL, PLSQL** to assist access review team to perform database, OS reviews reducing the time needed for extraction by **90%**.
- Applied various Database Controls such as IDM Integration, IDM Linking, Default password reset for built in accounts, Audit enabling, profile reorganization, unidentified account cleanup in accordance with regulations like SOX, GDPR, IP, EC on 100+ Databases reducing non-compliance risks by **70%**.
- Worked with **Python** libraries like **Pandas, NumPy** for acquiring data from different input database sources, reporting the overview and dispatch emails.

Capgemini

Dec 2018 – Apr 2019

PLSQL Developer Intern | SQL, PLSQL, Unix, MongoDB

Mumbai, India

- Devised an examination and evaluation system that performs several functions such as calculating the grade, finding out top performers, fetching required scores and handle any exceptional cases using **PLSQL**.

PROJECTS

Fable & Folio | HTML, CSS, React JS, Typescript, Axios, RESTful APIs/REST APIs, MySQL, Tomcat, AWS

[Git Repository](#)

- Engineered a **full-stack** bookstore web application with categorized book modules including end-to-end functionality for cart, checkout and confirmation pages.
- Deployed the app on Tomcat in **AWS EC2** (public subnet) with the database in **MySQL** on EC2 (private subnet) within a **VPC**.

PT Collab | HTML, CSS, JavaScript, jQuery, Django, Python, PostgreSQL, AJAX

[Git Repository](#)

- Built a collaborative web application enabling seamless communication between teachers and parents featuring dynamic content, secure user authentication, multi-role account system, activity feeds and real-time updates on student academic progress hosted on **Heroku**.

Event Ease | React, CSS, Axios, JavaMailSender, Spring Boot, AWS

[Git Repository](#)

- Engaged in all **SDLC** phases of the web application, contributed to documentation, requirement use-cases, creating wireframes and architecting user-centric front-end interface for event creation and response management.
- Configured **REST APIs** for image uploading, event data processing and deployed the application using **AWS Cloud**.

Myntra Fashion Analytics Dashboard | Dash, Plotly, GCP, HTML, CSS, Python

[Git Repository](#)

- Developed an interactive web application for analyzing the Myntra dataset, implementing features such as PCA, outlier detection and visualizations like pie charts, scatter matrices and correlation heatmaps.
- Integrated data preprocessing, statistical analysis and real-time updates with advanced Plotly visualizations for deeper insights into product data.

Guess My Number | HTML, CSS, Javascript, ES6

[Link](#) [Git Repository](#)

- An interactive web-based game where the player has to guess a secret number between 1 and 20.

Pig Game | HTML, CSS, Javascript, ES6

[Link](#) [Git Repository](#)

- A simple dice game designed and developed for two players.
